

Electric Counter Balance Stacker

CBES SERIES

INTRODUCTION

Counter balance stacker is a cost-efficient stacker that combines the versatility of a counterbalance forklift with the operational benefits of a pedestrian stacker.

It moves heavy loads from one place to another without the need for oversized fork truck equipment. Counterbalance design allows the operator complete access to three sides of the load. The open front enables the forks to be next to workstation for easy loading and unloading.

Counter balance stackers can be found working on loading docks, in stock rooms and on manufacturing floors, where durability and dependability are crucial. With its compact dimensions suited to confined areas, and legless design, the stacker can be used to lift practically anything you can think of as there are no "legs" to get in the way.

ELECTRIC REACH STACKER

Handle

All operating elements on the handle are easy to reach.

- The innovative AC drive system offers strong power, accurate control, excellent performance. High strength gearbox with long working life.
- Low noise but durable hydraulic unit, good quality cylinder as well as hose ensure high reliability of hydraulic system.

Standard battery

Long operating time with high capacity.

Adjustable forged forks, no baselegs, suited to any type of pallet truck, similar to a traditional forklift.

Tilting fork carriage for efficient load placement operations.

Side shift (Optional)

Side shift allows the load carried to be moved to the left and the right.

- H +H shape mast improves the strength of whole stacker.

Front wheels

Larger front wheels, easier to roll over uneven grounds.

Optional foldable platform & protective arm

Suspension foldable platform with protective arms.

The ergonomically designed foldable platform in combination with protective arms makes operations faster and safer.
